Lower your Cost of Care Coordination

As a hospital or health system, you need to manage avoidable hospital readmissions and facilitate smooth care transitions.

In addition to the threat of potential financial penalties, a strong care coordination program will lower overall costs and improve patient health outcomes. Beyond the financial implications, it's the right thing to do for your patients.

But how will you optimize your resources and implement a program that causes the least disruption to your current workflow?

Kinergy Health offers a collaborative care coordination solution designed to lower your costs without impacting the quality of service. Supported by a combination of evidence-based practices and user-friendly, HIPAA-compliant technology, Kinergy Care Navigators manage the logistics of care coordination so that your clinical team can serve more patients.

POWERFUL COMBINATION

Kinergy Care Navigators are trained, experienced patient advisors that serve as a seamless, cost-effective extension of your team. They support and reinforce care plans, patient education and decision making, letting you focus on the critical clinical aspects of patient care. Kinergy Care Navigators are a remote workforce that can be economically utilized across facilities, practices, and transitions of care.

MyKinergy, a HIPAA-compliant health collaboration platform, is the foundation of our solution. Accessible from anywhere, MyKinergy offers secure communication, document storage and information sharing across the patient's entire health care team. From checklists to reminders, to medication lists to care plans, MyKinergy leverages a streamlined, intuitive interface to make all of its functionality simple to use.

Together, Kinergy Care Navigators and MyKinergy increase the number of touch points you have with your patients, their caregivers and other providers. You benefit from enhanced patient satisfaction and a deeper, long lasting relationship with your patient and their care team — made possible more efficiently and economically than with your current solution.

KEY BENEFITS

Extend your team cost-effectively

Facilitate smoother care transitions

Reduce avoidable hospital readmissions

Enhance patient satisfaction

Communicate easily and securely

MYKINERGY PLATFORM

Supports care coordination including checklists, communications and resource materials

Is accessible from anywhere (web, mobile)

Provides role-specific views (patient, caregiver, provider)

Enables secure data collection and sharing

Requires no laborious installation or training due to its simple web-based user interface

Supports data exchange via secure document transfer, fax, Blue Button, and CCD (coming 2014)

CARE NAVIGATORS

Assist patients with the logistics of care coordination

Communicate through the MyKinergy platform, email, fax and telephone

Extend your team cost-effectively

Deepen your relationship with patient, their caregivers and other providers

Integrate seamlessly into your workflow

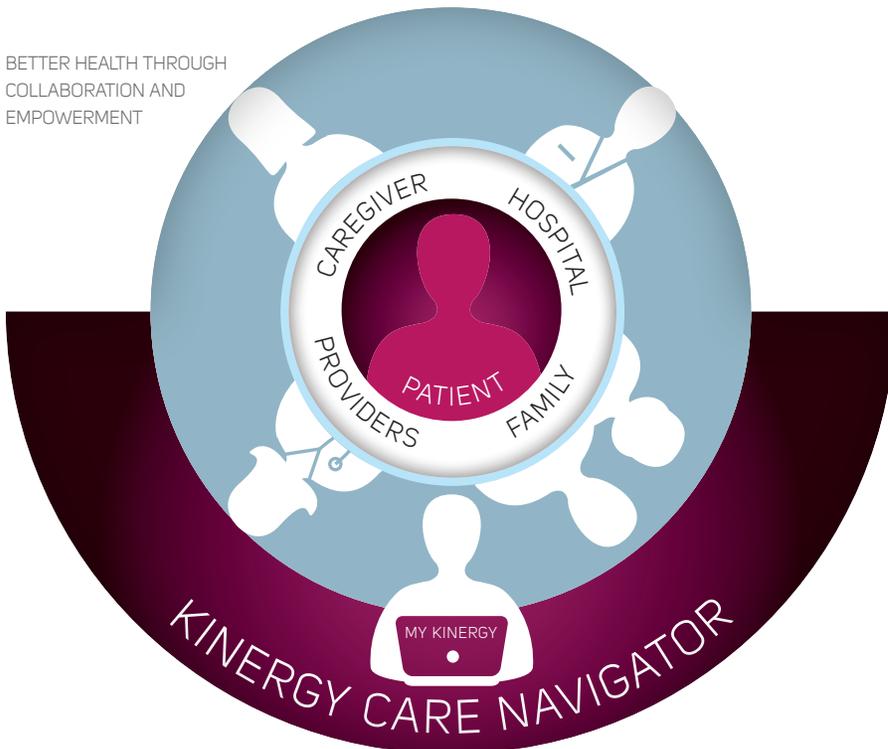

PROVEN STRATEGY

Kinergy Health's solution is based on the key pillars for effective care transitions examined in more than 43 studies, including the well-respected Care Transition InterventionSM Pillars as defined by Dr. Eric Coleman.

You know from experience that these transition interventions have been demonstrated to enhance outcomes for patients, families and providers alike. The challenge comes from the additional financial strain and burden on already overburdened staff required to implement a strong care coordination program. Kinergy Health is your solution -- we provide care coordination at the professional level you expect, for a fraction of the cost.

BENEFIT IMMEDIATELY

Let Kinergy Health help you coordinate care in a way that will provide you value right from the start. Kinergy Health offers you a cost-effective way to coordinate care and reduce avoidable hospital readmissions while always keeping in mind that collaboration and empowerment across the patient's entire care team is essential.

ABOUT KINERGY HEALTH

Kinergy Health is a forward-thinking company that seeks to establish the standard for collaborative, patient-centric care coordination. Kinergy Health facilitates cost-effective and efficient care through a combination of trained Care Navigators, evidence-based practices and user-friendly, HIPAA-compliant technology, resulting in improved outcomes and patient satisfaction.
